10135 w 93rd ave
St. John Indiana

Sorry I wasn't able to come to last consul meeting on water rates. I have three questions.

1. why would we have two water rates for the same amount of water based on your meter being $\frac{3}{4}$ or 1 inch?
 - 2. Why would non residents who are using only our sewer system and have no way to measure sewage be given the minimum sewer rate.
 3. Why would we give a discount for over 100,000 gallons. Seems we should be encouraging water conservation, especially on huge users
- Thank you
